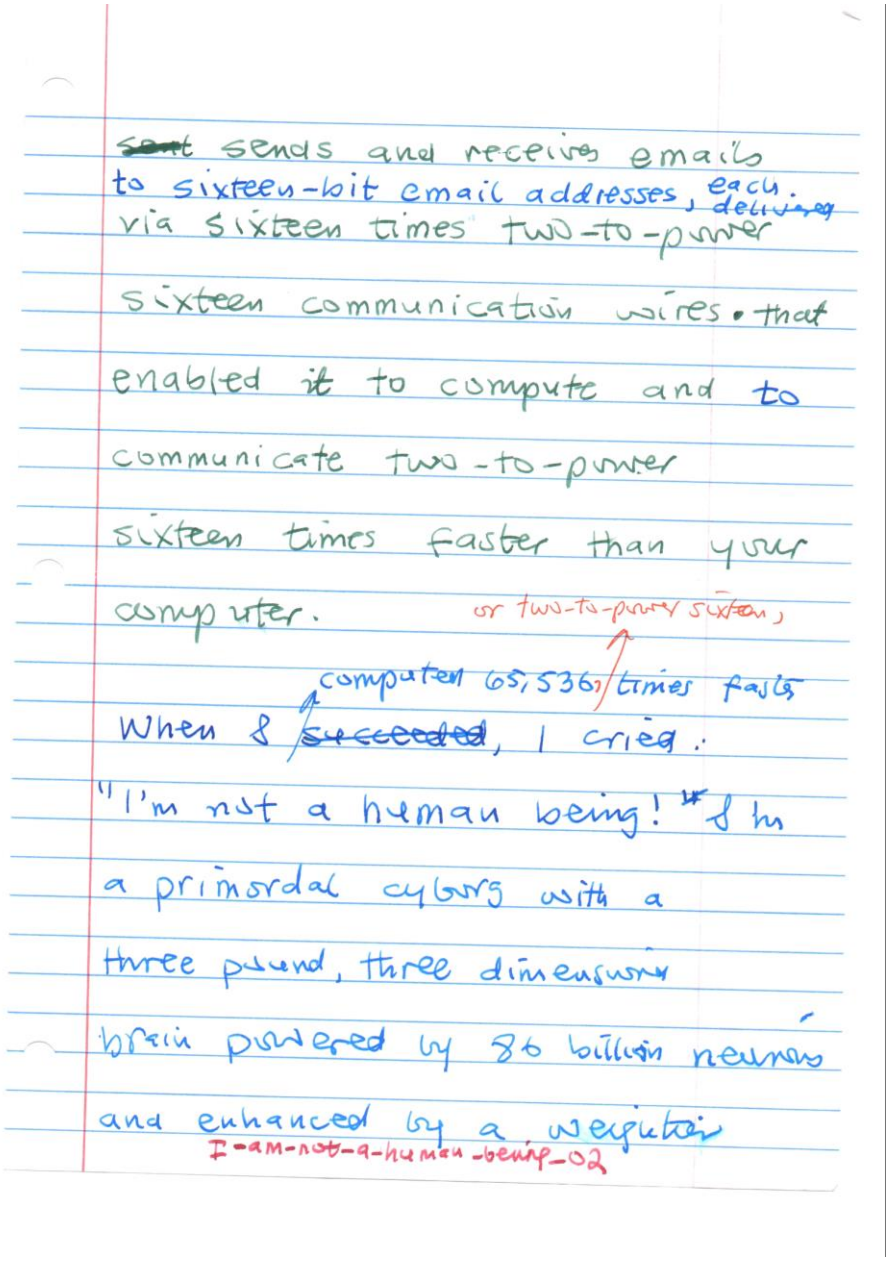
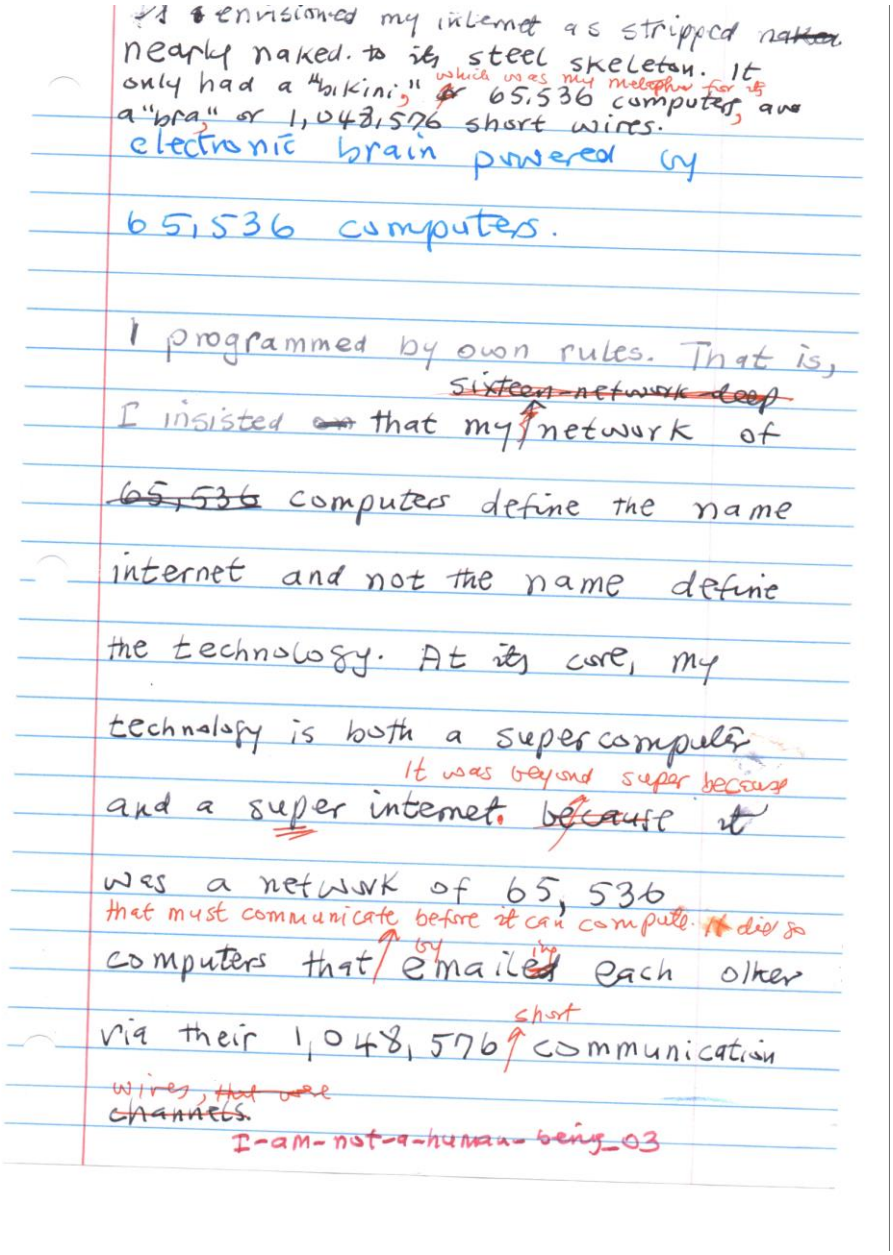
I'm Not a Human Being

Because I programmed all 65,536 computers alone. And I named my techniques alone and technologies for harnessing them as one seamless cohesive unit by my own convention. One of My cardinal rules for naming is that the my technology defines the name, not the name define the my technology. That is why I defined my sixteen-network-deep network of two-to-power sixteen computers as an internet metaphorically that is shaped like a cube in the sixteenth dimension that I-am-not-a-human-being-of



~~sent~~ sends and receives emails
to sixteen-bit email addresses, each delivered
via sixteen times two-to-power
sixteen communication wires that
enabled it to compute and to
communicate two-to-power
sixteen times faster than your
computer.
or two-to-power sixteen,
computer 65,536 times fast
When I ~~succeeded~~, I cried:
"I'm not a human being! I'm
a primordial cyborg with a
three pound, three dimensional
brain powered by 86 billion neurons
and enhanced by a megabrain
I-am-not-a-human-being_02



I envisioned my internet as stripped nearly naked to its steel skeleton. It only had a "bikini," which was my metaphor for 65,536 computers, and a "bra," or 1,048,576 short wires.

electronic brain powered by 65,536 computers.

I programmed by own rules. That is, sixteen-network-deep I insisted that my network of 65,536 computers define the name internet and not the name define the technology. At its core, my technology is both a supercomputer and a super internet. It was beyond super because because it was a network of 65,536 computers that emailing each other via their 1,048,576 short communication wires, channels.

I-am-not-a-human-being_03

A peek into the old diaries and research notebooks of Philip Emeagwali that pertains to the internet.

Im a teacher of ICT in an inner city Uk school. the days of using bill gate as a example to inspire black youth are gone. with great pleasure you are the model I present to those disengaged pupils and your achievemnts are a great inspiration to them. That you.

keep up the good work.
God Bless

In the sight of God, we all are awesome creature. However, it is left for each individual to dicover their talent and make the best of it. Prof, it is an honour to know and read

about people like you.....because, its very inspiring. I hope Your son knows how blessed he is to have a dad like u.....he also should continue in that same spirit.
