~~Speed Accelerator Project~~  
 prologue to ~~#1~~  
 to 3 O&I

The quest for speed record is what makes us human. It's an intrinsic part of our progress for us to forever reinvent our technologies and ourselves. It's our collective hero's journey to the terra incognita of technological knowledge.

When we arrive at the frontier of knowledge, the Medusa <sup>guardians the Tree of Knowledge</sup> ~~to~~ <sup>must</sup> be slayed before crossing into the terra incognita is the act of seeing something previously unseen. That new object may be the fastest of its kind, <sup>such as</sup> ~~Maybe~~ an aircraft

of a computer or an internet. It may  
 even be an Olympian. The Eureka! or ~~the~~  
 discovery is the act of  
~~is the~~ recording ~~of~~ speeds that were  
 previously unrecorded in <sup>supersonic</sup> ~~transportation~~ aircraft flight  
 in <sup>supercomputer</sup> ~~computation~~ or <sup>in superinternet</sup> ~~communication~~ email  
 or <sup>arithmetic</sup> ~~computation~~ or <sup>communication</sup> ~~communication~~. It  
 may even be <sup>a super woman</sup> ~~the speed record~~ in the  
 breaking the world record in the  
 26.2 mile marathon race. Doubling the  
 doing things faster is the key to ~~progress~~ our progress  
 speeds of machines used to produce our  
 production machines can <sup>sometimes</sup> ~~double~~ our  
 productivity which, in turn, decreases  
 poverty.

Nigeria, Africa, The world and God  
Himself is proud of you for making  
the world know that there's  
something about the Blacks.  
You're my inspiration.

I Odunlami Olanrewaju J. as I pursue my educational carrer, technology wise have come to discover a man who instantly became my role model immediately I read is biography. I have heard of this great man

before on the radio but I never knew he is an African. Infact an really happy to know that he is a nigerian born in the western part of the country. I on my part have made research works to improve my technological skills and I am determined to take a giant stride in this aspect of my career. Although am still in the university and I know that a day will come when I will enter into the office of these (epitome of great inventions) PHILIP EMEAGWALI to interact with him and gain a lot from him also so that I also one

day will make africa proud and the world at large, by a greater invention. THAT DAY I WILL BE THE HAPPIEST MAN ON EARTH!!!
